Re: Surface Water Application No. S3-30515

Dear Mr. Massnick:

Surface Water Application No. S3-30515 was filed on July 3, 2006 for an existing diversion from Wolf Creek, a tributary of the Pend Oreille River in the amount of 0.01 cubic foot per second for water use at Wolf Creek Ranch. After a site visit and meeting with Roger Hanlin (the contact for your application), it was determined that this application would not be sufficient to cover your existing project. It was also determined that a second application for groundwater would be needed for existing water use from your drilled wells on the property.

On September 17, 2012, you filed two separate applications to cover your water use at Wolf Creek Ranch under Surface Water Application No. S3-30677 and Ground Water Application No. G3-30676. On April 9, 2013 the Department approved your request under these two applications which were filed as a replacement for Application No. S3-30515. After discussion with Mr. Hanlin, it has been determined that S3-30515 is no longer needed. Based on these facts, Surface Water Application No. S3-30515 is hereby rejected.

YOUR RIGHT TO APPEAL

You have a right to appeal this decision to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this document. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal, you must do the following within 30 days of the date of receipt of this document:

- File your appeal and a copy of this document with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this document on Ecology in paper form - by mail or in person. (See addresses below.) Email is not accepted.

Subject: Application for Water Right

Roger, as discussed in my site visit on August 21, 2012, it appears that far more water is being diverted and used than the amount requested under Surface Water Application S3-30515 (0.01 cubic foot per second which is approximately 4.5 gallons per minute). It is recommended that this application be withdrawn and two new applications be filed to cover all uses. A separate application will be required for surface water (Wolf Creek) and ground water (4 wells). A new priority date will be given to each application.

Also, Jay Hedrick (caretaker) stated that the ponds are 20 feet in depth. If the ponds have a dam or dike retaining water, a reservoir permit may also be required. I didn't think this was the case but we can discuss when you return.

Here's the link for the application...

<https://fortress.wa.gov/ecy/publications/publications/ecy040114.pdf>

As discussed, here's a list of some of the information we will need:

For Surface Water diversion (Wolf Creek):

- Total cubic feet per second (or gallons per minute) diverted for all uses (irrigation and pond filling/fish propagation)
- Diversion location (legal description), pipe sizes, length, etc
- Amount required for irrigation
- Total area (# acres) of grass irrigated
- Site map showing all areas that are irrigated
- Description of irrigation system
- Pond sizes including maximum depth
- Amount required for pond filling
- Site map showing ponds and pipe locations

For Ground Water withdrawal (4 wells):

- Total gallons per minute pumped from all wells
- Gallons per minute from each well (separate out)
- Pump sizes, depths, well logs for each well
- Site map showing location of each well and the homes using water
- Legal description for each well

Will also need a legal description for the place of use for each application including parcel numbers.

If you have questions, please call.

Thanks,

Gene E. Drury

8/21/2012 - S3-30515, Massnick

FIELD EXAM

G. Drury

MET w/ Roger Hanlin - contact / previous owner
and Jay Hedrick - caretaker

Wolf Creek diverted for ponds, houses, irrigation
for exceeds 0.01 cfs (4.5 gpm)

No diversion on this date.

Wolf Creek flowing approx 225+ gpm at
diversion - picks up significantly downstream.

4" pvc pipe acts as cistern - approx 500 feet
before intalce @ "T" - then 1" poly pipe.

All gravity fed. from diversion - Probably need 30-50 gpm.

Ponds - 3 total (20 feet in depth) - w/ fish

No dam/dike (Pond 1, Pond 2 (irr), Pond 3 - "Rock") ^{cutthroat trout}
_{- catch basin pond}

Ground water used from (4) wells.

Used for main house, cabin - lawn irrigation

lawn irrigation for exceeds 1/2 acre - need application

Recommend withdraw S3-30515 and file

two (2) separate applications - SW and GW.

Attachments: USBR release 8-3-2012.pdf

Importance: High

OK folks, we finally have the green light from USBR to issue new water rights. Let's not waste any time. We'll talk about how to keep track of the quantity we issue.

Subject: Water quantity to withhold from Reclamation withdrawal

Bill,

Thank you for meeting with Ecology folks today regarding an option for Reclamation to withhold a quantity of water from its 2004 withdrawal request. As I mentioned during the meeting I wanted to update our spreadsheet to reflect current numbers. I have attached an updated spreadsheet and look forward to talking with you and other Reclamation staff in the next couple of weeks to keep this moving forward. Let me know if you have any questions.

Melissa

Subject: Requesting the Release of 48,880 Acre-feet of Water from Reclamation's Columbia River Withdrawal

Dear Mr. Kemner:

We have received your letter of July 24, 2012, requesting the release of 48,880 acre-feet of water from Reclamation's Columbia River withdrawal. This withdrawal was recently extended until December 23, 2014. Reclamation will release the amount you have requested.

If you have any questions, please contact me at 509-575-5848, extension 244.

Sincerely,

William M. Ferry
